

Parkinson's Exercise Classes in Western Pennsylvania

"If you have Parkinson's disease, exercise is even more important (than for those without)."

- Parkinson's Foundation

"Exercise is a realistic and practical way to fight Parkinson's disease."

- American Parkinson Disease Association

"Exercise is as important as medication for the management of Parkinson's disease."

- Parkinson Disease Foundation

Recent studies continue to stress the necessity for regular exercise in managing the symptoms of Parkinson's disease. In addition to enhancing physical abilities, exercise improves cognitive functions, overall mood, a sense of well-being, and it helps decrease depression. For most people with Parkinson's disease, exercise is an important tool for managing the disease.

Participating in Parkinson's exercise classes is a great way to help people overcome some of the most common excuses for not exercising such as "I don't know how to get started," "Exercise is boring or too hard," and "Exercise leaders don't understand people with Parkinson's disease." All the programs and classes that PFWPA offers provide a welcoming place to participate in professionally led classes, tailored to the needs of people with Parkinson's disease. Leaders and fellow participants provide the motivation and accountability that are critical to establishing and maintaining healthy new habits. The classes also provide a good venue for sharing information, experiences, and emotional support.

Have you been thinking about exercise but aren't quite sure how to start? Would you benefit from a dynamic group class to keep you motivated and continuing? Check out the various programs throughout the region. Locations and times are convenient with sites in communities around the region. All facilities are handicap accessible. Leaders are knowledgeable, energetic, and helpful. And best of all, classes are fun!

Check in with Parkinson Foundation Western Pennsylvania regularly! New classes, programs, locations, and participating organizations are being added regularly.

Description of Classes

Cardio Drumming and DrumFIT

Cardio Drumming is a whole-body exercise that involves drumming on large physio balls while maintaining rhythm to music. This is a moderate to high intensity workout that can be easily adapted to all fitness levels and done sitting or standing and modified based on the individual's comfort and response to the activity.

Dance for Parkinson's

Dance for Parkinson's is modeled after Dance for PD®, a renowned program which is gaining popularity and support throughout the world. The program offers specialized dance classes for people with Parkinson's and their supports. Professional teaching artists from Pittsburgh Ballet Theatre integrate movement from modern, ballet, tap, folk and social dancing to engage participants' minds/bodies and create an enjoyable, social environment for artistic exploration. This class is appropriate for anyone with PD, no matter how advanced. No dance experience is required.

Delay The Disease

Delay the Disease is a Parkinson's fitness program designed to empower people with Parkinson's disease by targeting symptoms and optimizing physical function. It is designed to proactively minimize tremors and improve flexibility, stability, balance, and strength. Classes include exercises to improve activities of daily living, like getting out of bed, getting off the floor, getting out of the chair, dressing, freezing, posture, rigidity, and moving about in crowds.

GZ Sobol Parkinson's Network™ – Foundations Class

GZSPN® Foundation class was created to help PWP improve their quality of life by restoring lost functions. It uses exercises that have been proven to help handwriting, gait, walking, rigidity, balance, posture etc. One of the keys to its success is to continuously raise the bar by progressing with more reps, holding poses longer, moving to more advanced challenges, etc.

Parkinson's Wellness Classes

This exercise program is an eclectic mix of functional exercises designed to help someone manage their Parkinson's more effectively. Exercises include aerobic and resistance or strength training, stretching, balance, facial and voice exercises. These classes are most beneficial for those with moderate to severe symptoms and who have difficulty with balance and/or walking.

Pickleball for Parkinson's

Pickleball is a great sport for those living with Parkinson's. It is a low-impact sport that helps keep you mobile and active, improves balance and hand-eye coordination and is just plain fun! Pickleball combines the elements of tennis, badminton, and ping pong. Pickleball uses paddles, a small wiffle ball, a net, and a court.

PWR!Moves™

Dr. Becky Farley, PhD created Parkinson's Wellness Recovery! (PWR!) as the evolution of her original LSVT BIG® physical therapy program. Exercise moves performed in this class are the building blocks for everyday movement and are performed with large amplitude, high effort, and attention to action in multiple postures. You will learn how to use these functional PWR!Moves exercises to target each symptom that interferes with your everyday movement.

Rock Steady Boxing™ and Boxing for Parkinson's Classes

A non-contact, boxing-based fitness program designed to improve the quality of life for individuals with Parkinson's disease. The specialized program uses training techniques to fight symptoms like tremors, stiffness, balance issues and gait, helping to slow disease progression through strenuous activity.

Up ENDing Parkinson's

A non-profit organization providing adaptive rock-climbing programs designed to improve the quality of life, balance, strength, and coordination for people living with Parkinson's disease. Founded in 2012 by Molly Donelan-Cupka, this evidence-informed, therapeutic program uses climbing to target both motor and non-motor symptoms of the disease.
